

MODEL QDD

"DUD BUSTER" SULFATED BATTERY CHARGER

With "Deep Discharge Recovery" mode switch for charging sulfated or deeply discharged maintenance free and conventional 12 volt batteries.

Christie's exclusive "Deep Discharge Recovery" provides extra initial charging voltage (18 volts) to break through battery sulfation. The charger automatically adjusts to normal charging voltage once the battery begins to accept charging current. The QDD has 300 amps of engine cranking capacity to boost start cars and trucks with dead batteries.

- **Higher Charging Performance**

The QDD "Dud Buster" is rated for 70 amps continuous duty battery charging. It has three 12 volt charging rates for versatile applications and a two-hour timer switch with a "hold" position. Can also be used to "boost start" cars with dead batteries.

- **Vehicle/Operator Safety Protection**

Christie's exclusive Spike Voltage Protection and Automatic Reverse Polarity Protection features prevent damage to vehicle computer electronic systems from charging voltage spikes/surges and reverse boosting. Also prevents sparks due to accidental reverse connections which can cause battery explosions.

- **UL Listed for Outdoor Use**

The "Dud Buster" is listed by Underwriters Laboratories and Canadian Standards Association for all weather, outdoor use.

- **5/2/1 Warranty Plan: America's Best**

Five years free replacement of transformers and rectifiers; Two years on other parts; One year free service labor at over 200 authorized Service Centers nationwide. Cables, cords and clamps excluded.

Specifications:

AC Input Power:

Volts AC 120
15 amps AC
60 Hz.

Dimensions:

Height 22 in.
(plus 19 in. handle)
Width 12 in.
Depth 10 in.
Wheels 6 in.
Weight 50 lbs.

DC Output Power:

12 Volts DC (Nominal)
70 Amps DC (Continuous)

MADE IN USA

UL/CSA Listed for Outdoor Use
